

BUTYCAPS

900 mg Tributyrin (787 mg Butyric Acid) / sachet

BUTYCAPS is a food supplement containing Microencapsulated Tributyrin.

Tributyrin is a triglyceride containing 3 molecules of butyric acid. It is a form of administration ensuring high bioavailability of butyric acid in all sections of the intestine.

Butyric acid has important actions for intestinal health, comprising both nutrition and trophism of the intestinal cells, such as favoring a balanced intestinal microbiota.

The microencapsulation technology of BUTYCAPS allows a slower and gradual release along the intestine.

BUTYCAPS are non-chewable granules. Each sachet contains 900 mg of tributyrin microencapsulated, equivalent to 787 mg of butyric acid. Each box contains 30 sachets.

Recommended Dosage: 1 sachet per day. Other dosages may be followed after the advice of a healthcare professional.

How to Use: Open the sachet and add its content to a yogurt or to a pureed consistency food. It can also be poured directly into the mouth and swallow in one or more times using a glass of water. Never chew. Never heat.

Preservation: Store in a cool, dry place and protected from sunlight. No refrigeration needed.

Ingredients: Fully hydrogenated sunflower oil, mono and diglycerides of fatty acids (E-471), tributyrin, banana aroma.
